

Empathize & Discover

1. Empathize

The Empathize phase focused on understanding the needs and difficulties faced by **employees, managers, and IT teams** during the laptop request process.

Stakeholder	Main Need	Problem Faced
Employee	Easy request submission	Manual email/verbal requests
Manager	Simple approval process	Approval delays
IT Team	Easy request tracking	Difficult to track requests
Management	Better visibility	Lack of centralized information

2. Discover

During the discovery phase, the following key problems were identified:

- Employees need a **simple way to submit laptop requests**.
- Managers need a **clear approval process**.
- IT teams need to **track requests and their status**.
- The system should **prevent duplicate requests**.
- Request details and reasons should be **captured consistently**.

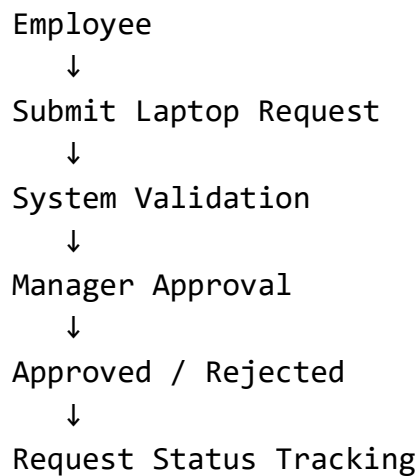

3. User Needs

User	Requirement
Employee	Submit and track laptop requests
Manager	Approve or reject requests
IT Team	Manage and monitor requests
Management	View request information and status

4. Key Insight

The discovery phase showed that a **centralized ServiceNow-based laptop request system** can reduce manual work, prevent duplicate requests, simplify approvals, and improve request visibility.

5. Simple User Journey

6. Conclusion

The Empathize & Discover phase helped identify the main user problems and requirements needed to build an **easy, controlled, and automated Employee Laptop Request Management System**.
